

Worksheet Four

Use the drawing above to answer the following questions.

1. What is the length of wall A?
2. What is the length of wall B?
3. How much crown molding would it take to go around the entire ceiling of this room?
4. How many one-foot square tiles would it take to cover the floor of this room?
5. How many boxes of tile would you have to buy if each box contains 2 dozen tiles? (Assume that the tiles are one-foot square)
