

Worksheet Five

1. Using the drawing above, calculate the length of wall "A". _____
2. Using the drawing above, calculate the length of wall "B". _____
3. If you are putting molding around all the exterior walls of this building, how many linear feet of molding must you order? _____
4. If this building is in a pasture, how much of the land is covered with the building? (HINT: Divide the house into three rectangles: calculate the area of each rectangle: add the three areas.)
